PROFESSIONAL SUMMARY

AI-native product builder with 9+ years of frontend engineering and a genuine passion for health, fitness, and behavior change. I build products from zero to one using Claude Code, Codex, and GPT-4 APIs, taking ideas through discovery, spec, build, and launch without a separate PM or engineering team. Over the past year I shipped 3 products end-to-end: TypescriptQuest, Conntext, and CanIParkHere. I'm drawn to Kickoff because I want to build technology that measurably improves how people live - fitness, nutrition, and behavior change are domains I care about, not just work in.

SKILLS

AI Tools: Claude Code, Codex, OpenAI API (GPT-4.1 vision), Prompt Engineering, LLM API Integration

Frontend: React, TypeScript, JavaScript, React Native, HTML, CSS, Tailwind, jQuery, Bootstrap

Backend / Full-Stack: Node.js, Express, REST APIs, PostgreSQL, MongoDB, Django, Python

Product: A/B Testing, Optimizely, Rapid Prototyping, MVP Development

Other: Supabase, Chrome Extension APIs, Stripe, OAuth, Digital Ocean, Netlify, Git

CORE COMPETENCIES

AI-Native Product Building

0-to-1 Product Ownership

Claude Code & LLM API Integration

Rapid Prototyping

Full-Stack Development

Behavior Change & Measurable Outcomes

A/B Testing & Experimentation

Consumer & Mobile Product

PROFESSIONAL EXPERIENCE

SalonCentric, a L'Oreal subsidiary

April 2023 - April 2025

Front End Engineer / Technical Support Engineer - Contract

- Drove measurable behavior change at scale: increased conversion rates by an average of 20% (2023) and user engagement by 124% (2024) by designing and running A/B experiments using Optimizely -- analyzed user behavior signals to identify what to test, measured outcomes, and iterated.
- Owned technical onboarding for 9+ third-party sellers (Shopify, Magento, custom APIs), translating recurring operator pain points into scalable technical solutions; contributed to a 4% increase in total sales volume in 2023.
- Owned all technical support for custom API integrations, contributing to a 1.25% increase in total sales volume in 2024. Served as main contact for marketplace business issues during senior integration engineer's paternity leave.

General Assembly

Oct 2022 - Jan 2023

Software Engineering Fellow

- Led development of 4 full-stack web applications using React, JavaScript, Tailwind, Node, Express, MongoDB, Django, Python, PostgreSQL, and REST APIs while adhering to MVC design patterns.

FullBeauty Brands

May 2018 - Jan 2022

Front End Engineer

- Achieved average monthly transactions of \$2.6M throughout 2021 and a monthly average of 939K unique page views by building conversion-critical product interfaces on Salesforce Commerce Cloud using HTML, CSS, and JavaScript/jQuery.
- Led WCAG ADA accessibility compliance efforts across 5+ brand sites, improving from level A to level AA.

Front End Web Developer - Contract & Freelance | NYC/NJ

- Delivered dynamic interfaces and microsites across 6 simultaneous agency and startup clients -- managed timelines and technical execution independently without a PM layer.

FEATURED PROJECTS

[TypescriptQuest](#) [Live](#) [GitHub](#)

Identified a gap in how developers learn TypeScript -- existing tools were passive and didn't change behavior. Owned the full product lifecycle solo: discovery, spec, build, launch, and iteration. Built a gamified platform with interactive coding challenges, XP progression, and badge achievements using Claude Code as the AI coding agent. Shipped to production with Stripe payments, OAuth, and serverless PostgreSQL. Real paying users; iterated the progression system based on drop-off signals.

React | TypeScript | Node.js | Express | PostgreSQL | Drizzle ORM | Tailwind | shadcn/ui | Stripe | OAuth | Claude Code

[Conntext](#) [Live on Chrome Web Store](#) [GitHub](#)

Led product vision and used Claude Code as AI coding agent to build and publish a Chrome extension that adds a private notes panel to any LinkedIn profile. Notes auto-populate with name and photo, persist across sessions, and surface instantly without leaving the page. Shipped end-to-end to a real distribution channel.

React | TypeScript | JavaScript | Supabase | Chrome Extension APIs | HTML | CSS | Claude Code

[CanIParkHere \(prototype\)](#) [GitHub](#)

Identified a real user pain point -- NYC drivers losing money on parking tickets. Built a working React Native prototype using Codex: user points camera at a parking sign, GPT-4.1 vision API outputs eligibility in real time. Validated the concept from pain point to testable product in under a week.

Expo | React Native | TypeScript | OpenAI GPT-4.1 API | Codex
